3D Printing Resins

We are as crazy about 3D printing as you! Top quality 3D printing resins dedicated to miniatures artists, engineers, and dental technicians that feature fast curing while preserving accuracy and details.

AmeraLabs AMD-3 Grey

Multifunctional resin for engineering and prototyping.

- **Fast curing (probably the fastest curing material on the market)**
- **High resolution**
- **Paintable surface**
- **Low odor**
- **Dimensional accuracy and stability**
- **Compatible with most LCD resin 3D printers**

AmeraLabs SiOmaster Grey

Developed for professionals utilizing spin casting and SiOCAST injection molding machines.

- **Withstands vulcanization up to 180° C**
- **Low shrinkage**
- **Excellent details**
- **Easy to remove supports and sand**
- **Dimensionally accurate**
- **Compatible with most LCD and DLP resin 3D printers**

AmeraLabs TGM-7 Clear

Designed specifically for 3D printing tabletop gaming miniatures.

- **More flexible, less breakable**
- **Excellent detail**
- **Low odor**
- **Compatible with most LCD resin 3D printers**
- **Hard and non-sticky, paintable surface**
- **Fast curing**

AmeraLabs TGM-7 Grey

Fast curing resin is designed specifically for 3D printing tabletop gaming miniatures.

- **More flexible, less breakable**
- **Excellent detail**
- **Low odor**
- **Compatible with most LCD resin 3D printers**
- **Hard and non-sticky, paintable surface**
- **Fast curing**

AmeraLabs XVN-50 Black

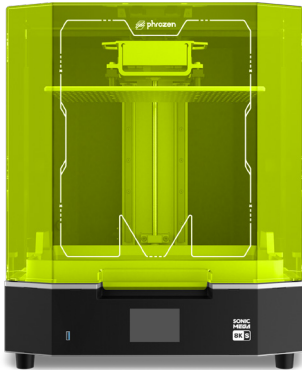

Versatile Engineering 3D Printing Resin – a superior blend of durability, flexibility, and precision.

- **Impact resistance**
- **Compatible with most MSLA and DLP resin 3D printers**
- **Low odor**
- **Dimensionally accurate and stable**
- **Hard and non-sticky, paintable surface**
- **Fast curing**

3D Printers and Accessories

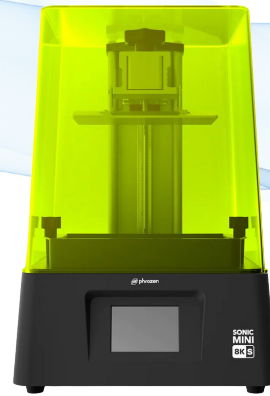

Professional 3D printers and accessories for industrial, medical, and personal use applications.

Phrozen Sonic Mega 8K S

Combines speed, accuracy, versatility, and remarkable 8K resolution to bring your creative visions to life.

- Intricate precision at a scale of 43µm
- 15" perforated build plate
- 15" mono-LCD screen
- Printing speeds of 600 layers per hour
- Integrated resin drip hanger

Phrozen Sonic Mini 8K S

The perfect resin printer for those diving into the creative world of 3D printing for the first time!

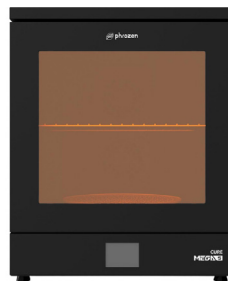

- Incredible resolution of 22µm
- Powered by a 7.1 inch monochrome LCD screen and a linear projection LED module
- 8K LCD technology
- 50% reduced layer lines for delicate objects boasting astonishing detail

Phrozen Wash Mega S

Advanced washing solution designed to enhance the way you clean your 3D prints.

- 25L washing capacity
- Dual speed settings
- Double vortex system
- Supports various building plate sizes
- Automatic reverse function

Phrozen Mega Cure S

This advanced curing solution ensures your 3D creations achieve impeccable curing quality and consistency.

- 360° transparent turntable
- Dual high-speed fans
- Built-in interior light
- Detachable rack

Revopoint Miraco Pro 3D Scanner (32GB)

All-in-one handheld product that can take amazing 3D scans without the need for a computer or smartphone.

- 6.2" AMOLED touchscreen to view and edit your scans
- 32GB internal RAM for up to 10,000 frames of continuous scanning
- 5000mAh battery for 2 hours of scanning
- 2.4GHz on-board processor and 256GB internal hard drive
